

Action plan submitted by çağla lapçin for Başiskele Gübretaş İlkokulu - 24.03.2022 @ 11:43:01

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities. You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › It is good that your email system is protected and that you have a policy for the transfer of pupil data in place. In this regard, it is important to draw up guidelines so that all staff are clear about what to do if they discover

inappropriate or illegal content on school machines. For further information see the fact sheet on Protecting sensitive data (www.esafetylevel.eu/group/community/protecting-sensitive-data-in-schools).

Software licensing

- › Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.
- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.

IT Management

- › In your school only the head master and/or IT responsible can acquire new software. Consider putting a system into place where teachers can ask for new software in a non-bureaucratic and timely fashion. This allows teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

Policy

Acceptable Use Policy (AUP)

- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylevel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylevel.eu/group/community/school-policy) will provide helpful information.
- › School policies and procedures are essential to ensure a smooth operation within a school and that all school members follow the same set of rules and guidelines. Ensure that school policies exist and that all school members are aware of them. You can find more information on this in the of the eSafety Label website.

Reporting and Incident-Handling

- › Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylevel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.
- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylevel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others

can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

Staff policy Pupil practice/behaviour

- › Your school partly has a school wide approach of positive and negative consequences for pupil behaviour. This is a good start, make sure that the policy and associated hierarchy applies to all on- and offline issues and is shared widely and re-visited by all staff and pupils at least annually.

School presence online

- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- › We recommend that you specifically nominate a web-experienced staff member to periodically check the school's online reputation. Monitoring such an important aspect on an ad hoc basis only is insufficient. Remember that this is the image that prospective parents will receive when they search for your school online.

Practice

Management of eSafety

- › In your school, teachers are responsible for their own pupils' online activity. There are many network security and user privacy, audit and procedural tool checks and balances that need to take place to ensure the safety of your pupils and the school networks, and these should be laid down in your School Policy. See our fact sheet on School Policy at www.esafetylabel.eu/group/community/school-policy.

To ensure this happens as efficiently and often as necessary, we advise that the Principal of your school appoints one individual staff member to look after eSafety management in the school. This person will be responsible for seeing that all aspects included in your School Policy are discussed and looked at with other teachers as well as with pupils in the classroom.

To ensure that every staff member, pupil and parent is aware of her or his online rights and responsibilities, see the fact sheet on Acceptable Use Policy (www.esafetylabel.eu/group/community/acceptable-use-policy-aup-).

eSafety in the curriculum

- › It is good that you are making a specific reference to sexting within your child protection policy as this is a

growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.

- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).
- › While it is good that you discuss consequences of online actions terms and conditions, online payments and copyright with older pupils, consider discussing these also with young pupils.
- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylevel.eu/group/community/pupils-use-of-online-technology-outside-school.
- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).
- › Try to develop further the engagement of pupils in peer mentoring and provide them with more opportunities to share their thoughts and understanding with their peers. Also check out the resource section of the eSafety Label portal to get further ideas and resources.

Sources of support Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the

Forum, and your reporting of incidents on the template provided are all also taken into account.
